

Cannon's Canon of Orchestral Music

by Gary D. Cannon, May 2020

Last week, a friend asked what orchestral music I would recommend for beginners. The orchestra has been my great artistic love for three decades now, and my extensive recording collection, professional music training, and passion for musicology have contributed to opinions that are at least mildly expert. Combining two of my favorite loves—orchestral music and lists—has thus proved a welcome diversion during the covid quarantine. My gratitude goes to Trevor Tsang for unwittingly initiating this project, and to David Horiuchi and especially Doug Wyatt for their enthusiasm in its initial phases.

This list includes, in its complete version, over 1400 works: far more than an introduction, obviously. Hence I have grouped them into five priority levels. These tiers are not intended as judgments of a work's quality, but of its effectiveness in introducing an unfamiliar listener to the orchestra. For example, all nine Beethoven symphonies are essential listening for any orchestral fan, but I have chosen to prioritize only a subset of them. My goal throughout was to favor variety over popularity.

Some of these works are revered more by reputation than by frequency of performance or recording. In general, I have relied on my own experience in making and ranking selections. But I have also been aided by ArkivMusic's listing of currently available recordings, together with articles from Grove Music and Wikipedia, which provide different types of information, both useful.

This list spans the entire evolutionary history of the orchestra. Choosing recent works has a special challenge in that time has yet to decree which works will stay in the permanent repertory. The closer we get to the present day, perforce the more subjective my choices become. I also recognize that I have not followed Continental trends very well over the last twenty years, but resolving that deficiency far transcends the scope of this project.

I have chosen to omit operas, theatrical incidental music, film scores, and other mixed media that require a visual element for optimal distribution. Concert suites are included, but opera arias are not. Perhaps contradictorily, ballet scores are included, as they often demonstrate the orchestra without visuals. Predominantly choral works are relegated to an appendix, though the principal lists do include orchestral music with a brief choral element and choral works called symphonies. These decisions are perhaps controversial, and I may handle them differently in future editions.

Please delve into this list in whatever manner and at whatever level you feel is appropriate. Someone who listens only to Priority 1 will have an admirable grounding in the orchestral craft and its history. If you discover composers, eras, or nationalities that especially appeal to you, I invite you to explore them at a deeper level. Those who listen to all five tiers will develop a particularly extensive knowledge of orchestral music: I confess that even I know about a hundred of these works more by reputation than by ear.

I am happy to share the original Excel spreadsheet at request, so you can organize the data in a way that is most useful to you. As it is, I list the works in the manner that I suggest may be most beneficial for those listeners exploring each particular level.

Happy listening!
